83. The “top-down” method may identify an activity as the principal activity of the unit, even though this activity does not account for the largest overall share of value added. However, this approach ensures better consistency with aggregated data. Following is an example for applying the “top-down” method to determine the classification code for a statistical unit.

### Example - Identifying the principal activity of a reporting unit using the top-down method

The identification of the principal activity is done in five steps:

1. List the activities carried out by the unit, attributing to each appropriate class of ISIC Rev. 3.1 the value added (or another relevant measure if it is not possible to calculate the value added - see paragraph 80).
2. Determine the section of ISIC Rev. 3.1 that has the highest share of the chosen measure.
3. Within this section, determine the division of ISIC Rev. 3.1 that has the highest share of the chosen measure.
4. Within this division, determine the group of ISIC Rev. 3.1 that has the highest share of the chosen measure.
5. Within this group, determine the class of ISIC Rev. 3.1 that has the highest share of the chosen measure. This class identifies the principal activity.

Example:

Step 1: A reporting unit may carry out the following activities:

Section	Division	Group	Class	Description of the class	Share of value added
D	28	281	2812	Manufacture of tanks, reservoirs and containers of metal	7%
		29	291	2915	Manufacture of lifting and handling equipment
	292		2922	Manufacture of agricultural and forestry machinery	3%
			2924	Manufacture of machine-tools	21%
			2925	Manufacture of machinery for mining, quarrying and construction	8%
	34	343	3430	Manufacture of parts and accessories for motor vehicles and their engines	5%
G	51	511	5110	Wholesale on a fee or contract basis	7%
		515	5159	Wholesale of other machinery, equipment and supplies	28%
K	74	742	7421	Architectural and engineering activities and related technical consultancy	13%

The principal activity is then determined as follows:

Step 2: Identify the section

Section D	Manufacturing	<b>52%</b>
Section G	Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods	35%
Section K	Real estate, renting and business activities	13%

Step 3: Identify the division (within section D)

Division 28	Manufacture of fabricated metal products, except machinery and equipment	7%
Division 29	Manufacture of machinery and equipment n.e.c.	<b>40%</b>
Division 34	Manufacture of motor vehicles, trailers and semi-trailers	5%

Step 4: Identify the group (within division 29)

Group 291	Manufacture of agricultural and forest machinery	8%
Group 292	Manufacture of machine-tools	<b>32%</b>

Step 5: Identify the class (within group 292)

Class 2922	Manufacture of agricultural and forestry machinery	3%
Class 2924	Manufacture of machine-tools	<b>21%</b>
Class 2925	Manufacture of machinery for mining, quarrying and construction	8%

The principal activity is, therefore: "**2924 Manufacture of machine-tools**", although the class with the biggest share of value added is class: "5159 Wholesale of other machinery, equipment and supply".

If the allocation had been made directly to the class with the largest share of value added this would have achieved the strange result of putting this enterprise outside manufacturing.

#### **(b) Treatment of vertical integration**

84. Vertical integration of activities occurs where the different stages of production are carried out in succession by the same unit and where the output of one process serves as input to the next, for example, tree felling combined with saw milling, a clay pit combined with a brickworks or production of synthetic fibres associated with a textile mill.
